

Remarks

The specification has been amended to correct minor translation errors and to conform the text to idiomatic American English. Redundant and/or repetitive language has been eliminated. United States Patent and Trademark Office recommended headings and subheadings have been added as well. The claims have been rewritten in U.S. format, eliminating multiple dependent claims in the process. No new matter has been added by virtue of these amendments. Early favorable consideration is respectfully requested.

Respectfully submitted,

CHRISTIAN OCHS ET AL.

ABSTRACT OF THE DISCLOSURE

Cyclodextrinyl group-containing organosilicon compounds contain cyclodextrin or cyclodextrin derivatives bonded to an organosilicon moiety through a divalent linking group. The compounds are easily prepared in high yield by reaction of reactive cyclodextrin or cyclodextrin derivatives with an organosilicon compound reactive therewith. The compounds have numerous uses, including treatment of organic fibers to provide long lasting fragrances or freshness characteristics.
